

Industrial Water Specialist

Central Solutions is seeking to expand its Corporate Water and Sustainability Team with an experienced Industrial Water Specialist. Over the last ten years the team has led the development and delivery of corporate solutions for water stewardship, water mapping, data management, water risk management, behavioural change, regulatory and standards alignment, lean and six sigma methodologies and overarching corporate water strategy development.

The team's contribution to national and international sustainability efforts has most recently been recognised when it was awarded the 2018 Sustainable Water Achievement Award in Ireland. The team currently manages the Large Water Users Community of Practice in Ireland (www.smartwater.ie), delivers the Irish Water Certified Water Stewardship Programme nationally and contributes to global water conservation and stewardship initiatives and standards including AWS and EWS. In 2020 the team will commence work on a new Industrial Water 4.0 Programme supported by the EPA and in collaboration with international water research centres.

As an Industrial Water Specialist, you will be/have:

- An honours Bachelor or Master's (preferably) degree in an Environmental Management, Water Resource Management, Civil, Engineering or Scientific domain.
- A minimum of 5 years' experience in industrial water services projects with significant experience in the delivery of water conservation, water stewardship and management of industrial water projects.
- Experience and expertise in metering, monitoring, water risk assessment, lean six sigma and water mapping.
- Experience in training and facilitation would be advantageous.
- Team player approach with excellent communication skills (both written and verbal), team working skills and analytical skills.
- The ability to lead and motivate themselves and others; willingly takes ownership of issues and seeks team participation to achieve best solution.
- The ability to define problems, collect data, establish facts, draw valid conclusions, and make recommendations.
- The ability to devise new approaches to solving problems encountered.
- Excellent IT skills, (MS Excel in particular) and resource efficiency and mapping software.
- Experience working within programmes, working to deadlines, progress reporting.
- Previous experience in reviewing water asset data and developing appropriate solutions.
- Knowledge and experience of the implementation of environmental management systems and standards such as ISO14001, ISO50001, EWS, AWS etc.
- Experience in pricing proposed designs for previous business plans / tender submissions.
- Good communication skills – proficient in English
- Authorised to work in Ireland / EU

Capabilities:

- Prioritise tasks, work with schedules and manage resources while remaining focused on team goals.
- Secure and compare information from multiple sources to identify issues; committing to an action after weighing alternative solutions against decision criteria.
- Set high standards, by encouraging others to assume responsibility and accountability for tasks.
- Manage issues within the team and act as a point of escalation.

This role will be based at Central Solutions offices at the National Technology Park in Limerick. Remuneration is negotiable and will be in line with relevant experience.

If you would like to join an innovative company that will challenge you to think outside the box, is passionate about the service it provides and has significant growth plans, this role is for you. In return, you will be offered a dynamic and stimulating career with an attractive reward package along with a great team environment. We also deliver comprehensive training and career development programmes for all professional levels.

Central Solutions is recognised both in Ireland and internationally as a leader in innovative industrial water programmes and projects and a significant contributor to new approaches to sustainable corporate water management, skills development and water optimisation projects.

We do not require the assistance of Agencies at this time.

November, 2019.
